

TECTUM IS COMING BACK WITH REVENUE-POSITIVE ECOSYSTEM

Tectum team is proudly announcing the New Tectum Ecosystem and its framework.

New Tectum is designed to service the upcoming AI-driven service markets along with Softnote payment processing while rewarding the Community for participating in transaction processing and mass adoption. New Tectum will be decentralized, AI-friendly, super-fast, secure and incentive-focused. Tectum 3.0 and Tectum 4.1+ are now molded together with a frictionless zero-fee migration bridge and will be able to meet Enterprise and Web3 needs for every particular product: Softnote

THE MAIN COMPONENTS OF THIS NEW FRAMEWORK ARE COMPRISED OF:

COMMUNITY PAYMENT PROCESSING

Yes, you heard it correctly, we intend to share the Softnote ePOS generated revenues with our community and we are tokenizing this. Softnote payment processing is designed to turn any smartphone into ePOS terminal which adds last missing piece to the ecosystem puzzle; strong incentive for the community to promote the system and great mass adoption driving force.

60% - LOYALTY REFERRAL SYSTEM: What used to be a plain 20% minter and 20% liquidity provider rewards now became 60% sophisticated reward program that benefits both beneficiaries and mass adopters. Basically, we have chipped in additional 20% that used to be dedicated to ISOs making it huge 60% share in ePOS fee.

20% - SHARE IN INTELLECTUAL PROPERTY: Tectum team is opening the access 1/5th of the ePOS revenues to TCT holders; it will be done in fair proportion through discounts and cashbacks.

20% - TEAM REWARD: Yes, we are keeping only 20% for ourselves and giving away the majority share of 80% to the Community in order to trigger mass adoption.

OVERVIEW

The Tectum Cash Token (TCT) is a utility token designed to enhance the Tectum ecosystem, providing holders with various benefits, exclusive services, and governance rights etc. TCT is an essential component of Tectum's mission to create a robust and engaging digital financial ecosystem.

TECTUM CASH TOKEN (TCT) VIRSUS TET

The previous Tectum funding model was designed around pre-revenue business model of Tectum – this year Tectum becomes a revenue generating project after Softnote ePOS starts generating revenue in 3rd Quarter 2025; in other terms TECTUM BOOK VALUE IS MUCH HIGHER THAN ITS MARKET CAP. The first and most important statement is that TCT is designed to complement the utilities of TET and not to displace TET, TET will always remain as the only way to mint softnotes and the only way to get paid within Tectum ecosystem. Here is how:

Token Properties & Utilities	TET	TCT
Core Purpose	Minting Softnote	Tectum Governance
Monetary Services	4.1+ Network Fuel	Access to Rewards
Current Emission	10M	200M
Fee to Mint Softnotes paid in:	Yes	No
Fee to Mint NFT Softnotes paid in:	Yes	No
Fee to Mint Digital Checks paid in:	Yes	No
Tectum 4.1+ Validator Earnings paid in:	Yes	No
Tectum 4.1+ Archiver Earnings paid in:	Yes	No
Tectum 4.1+ Transaction Commissions in:	Yes	No
Purchases when using Token	Yes	Yes
Discounts when using Token	Yes	Yes
Minable Token/Coin	Yes	No
ePOS merchant fees paid in:	Yes	No
Beneficiaries Paid in:	Yes	No
Referral Loyalty Program Paid in:	Yes	No
Access to Intellectual Property Royalties	No	Yes
Intellectual Property Monetizable	No	Yes
Access to ePOS revenues	Yes	No
Access to ePOS Loyalty Sharing	No	Yes
DeFi: Lending and Borrowing	No	Yes
Redeemable Discounts (Convertible to Cash)	No	Yes
Stakable	Yes	No
Staking Rewards paid in:	No	Yes

Governance Rights: Community Voting	No	Yes
Access to Exclusive Events	No	Yes
Priority Access	No	Yes
Airdrop Rewards	No	Yes

MAIN SERVICES AND PROPERTIES OF TCT TOKEN

1. ROYALTY: SHARING REVENUES THROUGH CASHABLE DISCOUNTS

TCT holders will benefit from a direct access to the revenues generated by the Tectum ecosystem. Each TCT token entitles its holder to a share of the royalties earned, ensuring that investors have a stake in the project's financial success, this must be executed through discount mechanisms.

2. STAKING OPPORTUNITIES

TCT holders will be able to participate in staking programs, allowing them to earn rewards in TCT. Additionally, promoting active involvement within both the Tectum ecosystem and the broader community.

3. DAO GOVERNANCE: GET PAID TO VOTE

TCT holders enjoy voting rights in governance decisions that impact the Tectum platform influencing key decisions and developments. This feature empowers the community to actively participate in shaping the future of Tectum ecosystem and get paid for it through know-how reward system.

4. EXCLUSIVE ACCESS TO FEATURES

Holders of TCT will enjoy exclusive access to premium services and features within the Tectum ecosystem and beyond, including:

- A. Discounted Services: Reduced fees on various services offered within the platform.
- B. Priority Access: Early access to new tools, features, and innovations being developed within the Tectum ecosystem.
- C. Special Events: Invitations to exclusive community events, webinars, and engagements with project developers.

6. SOFTNOTE NFT PURCHASES

TCT holders will have the opportunity to purchase exclusive SoftNote NFTs using TCT. This creates a unique offering that combines digital art and financial utility, enhancing the overall value of holding TCT.

7. COMMUNITY FUND PARTICIPATION

A portion of the TCT supply is allocated to a community fund that supports community-driven initiatives and proposals. TCT holders can participate in the fund's activities, proposing and voting on projects that benefit the ecosystem.

8. AIRDROP REWARDS

As part of the initial distribution strategy, TCT will be airdropped to existing Tectum community members. This initiative aims to reward loyalty and encourage further participation, fostering a strong community around TCT.

9. LENDING AND BORROWING:

This feature will enable users to lend their TCT tokens to earn interest or borrow against their holdings, creating additional utility and earning potential.

10. REWARDS FOR GOVERNANCE PARTICIPATION:

This feature will enable TCT holders' rewards for participating in governance activities such as voting, incentivizing community engagement and active decision-making, as well as incentives for community for promoting TCT.

11. DEFI: LENDING AND BORROWING

Allow users to use TCT tokens as collateral for loans secured on smart contracts, providing liquidity options while retaining the potential for earning.

12. INTELLECTUAL PROPERTY

New Tectum Cash Token is targeting major aspect: access to the intellectual property in a form of progressive redeemable discount that can be redeemed as a cashback.

BLOCKCHAIN TWINS TECTUM 3.0 + 4.1

MORE ABOUT TECTUM 4.1+: Tectum 4.1 (and its next versions +) will be decentralized, fast, user-friendly and incentive-focused blockchain network that will target tomorrow's World: our team is bedding on rise of AI involvement in tomorrow's World affairs; we have been modeling Tectum 4.1+ to accommodate AI service markets and the Softnote to become first in the World AI payment platform.

Look forward to AI KYC, AI Marketplace and ColdPay wallet with off-grid payment capabilities.

Therefore, Tectum Token becomes a minable Tectum Coin in new AI-centered, decentralized 4.1+ ecosystem being mined by Archiving Nodes. Besides being mined TET can also be migrated from 3.0 to 4.1 network and back with zero network fees or migrated back from outside networks through ERC20 or Solana gateways. Validators are rewarded with freshly mined TET Coins for processing transactions; this means that 10 million TET hard cap will start slowly rising which will be a great news to rising ecosystem user base that will require more and more TET to pay for added utilities and liquidity pools.

COLDPAY: OFF-GRID CRYPTO PAYMENTS

ColdPay is an elegant Web3 solution designed to enable Crypto community to conduct Softnote payments and change Softnote nominal even when internet connection is disrupted (Recent developments in iOS and Android libraries finally have reached levels of maturity when encrypted libraries become inaccessible to the actual device user) – Mobile App will be capable to transfer Softnotes in “Off-Grid” (no internet) environment. ColdPay will be presented as a mobile app, designed to drive user traffic to the main SoftNote model at the point of off-ramping funds. Its main source of revenues will be “Peer-to-Peer” trading in Web3 mode.

ENTROHIVE (FORMER TECTUMKEYS)

The computing power is about to boost forward in a single move at any given point at any point in time, to us this meant that reverse-calculation is going to become a commodity service rather than a privilege. Recent innovations in quantum computing could turn a “Billion year” decryption problem into a 10-minute task; breakthrough of this kind could have a disastrous effect on crypto industry heavily dependent on a quality of private key entropy. Entrohive is targeting the entropy market as a Web3 Community tool capable to generate competitive entropy and community rewards – two in one.
