

# From the creators of Tectum — introducing TCT: the token built for real utility.

## What is TCT?

The Tectum Cash Token (TCT) is a utility token designed to enhance the Tectum ecosystem, providing holders with various benefits, exclusive product features, real revenue sharing, governance and DeFi functionality. TCT is an essential component of Tectum's mission to create a robust and engaging digital financial ecosystem.

TCT is the community-powered utility token of the Tectum ecosystem, designed to reward, engage, and empower its holders.

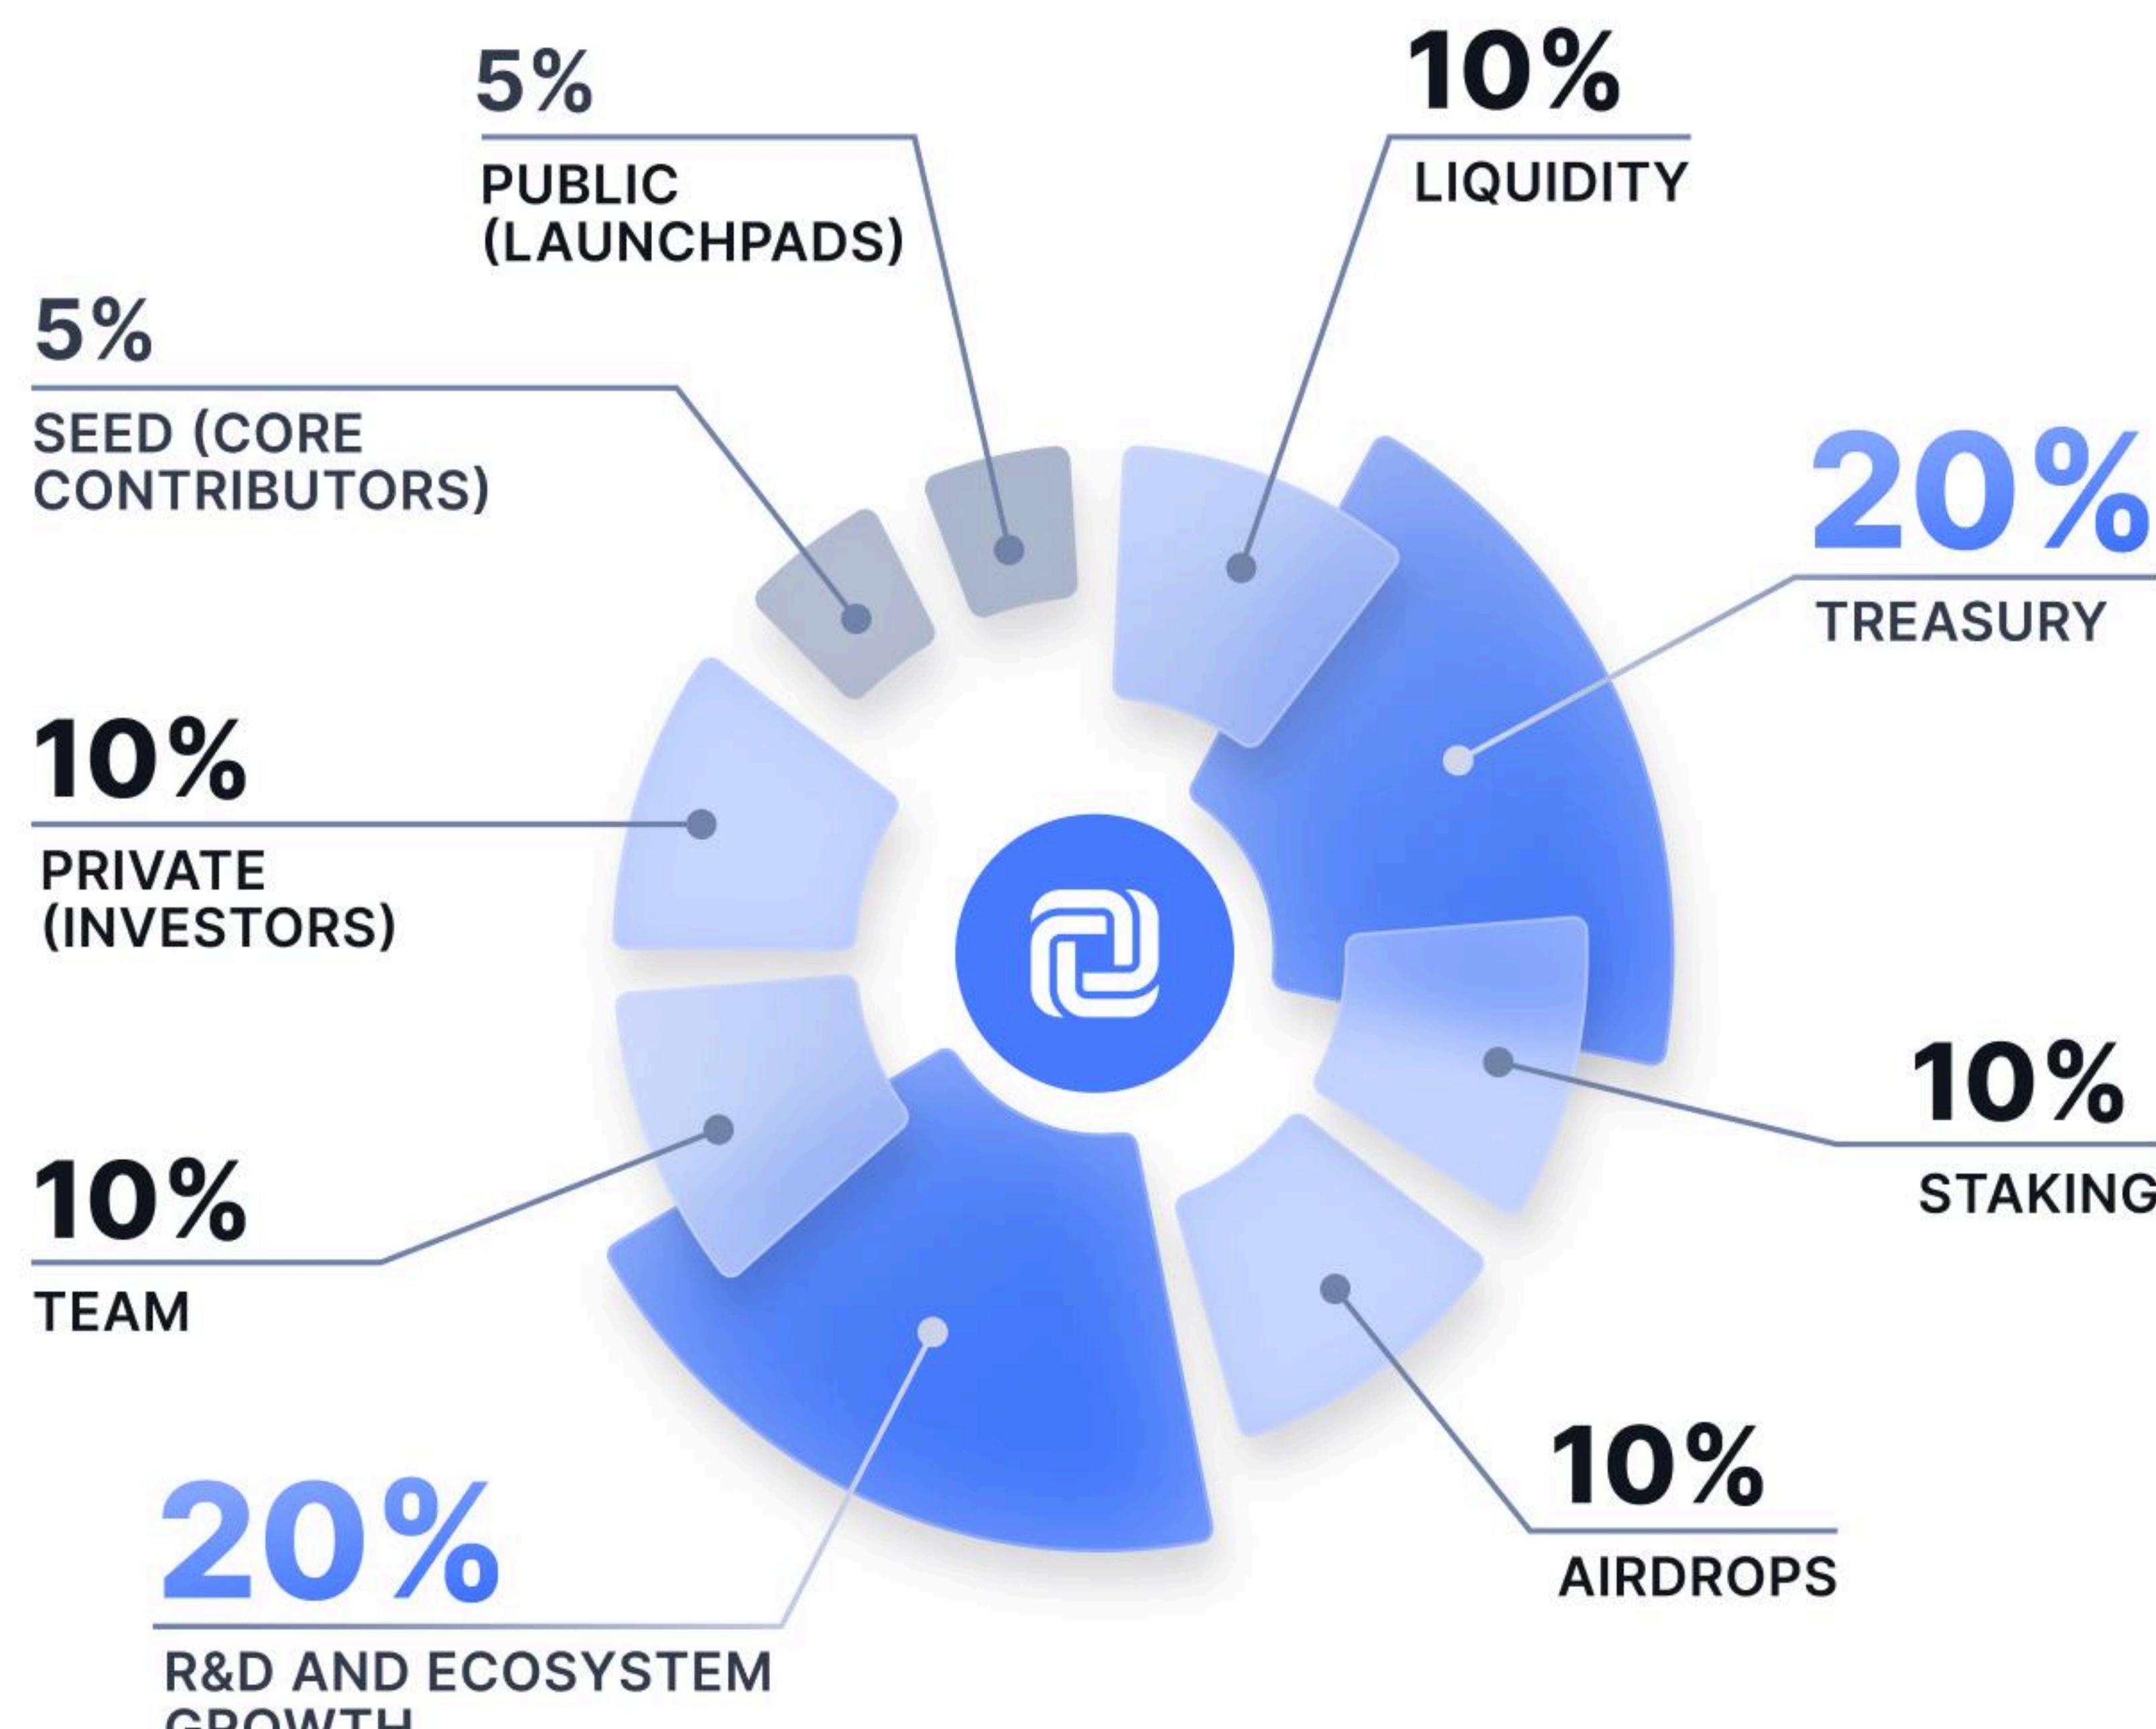

**Tectum is coming back with revenue-positive ecosystem.**

### Key Utilities

### Token Allocation

Total supply 200 million

### What Makes TCT Unique?

Revenue Sharing – 20% of all SoftNote ePoS (Electronic Point of Sale) fees go directly to TCT holders

Self-Executing Logic – Rewards are fully automated, direct, and non-custodial

### Legal and Regulatory Compliance

TCT is not a security token (utility only)

Designed to be Howey-compliant

No equity, no ownership, no profit rights

Revenue sharing is protocol-embedded

Issued in token-friendly jurisdictions: UAE, Switzerland, Seychelles, Liechtenstein

### Why Investors are Watching TCT

Real on-chain yield, no middlemen

Legal clarity and compliant structure

Future-ready: Tectum 4.1+ is AI-compatible

Scalable access across PayFi, DeFi, DAO, and ePoS

Designed by the community, for the community

**Up to 25% discount when purchasing**

**@TCT with [TET](#)**

### Roadmap Highlights

Q2 2025

#### Foundation and Development

Define utility, tokenomics, and legal structure

Launch Testnet and integrate token into product

Q3 2025

#### Launch and TGE

Whitelist

Launch staking, governments, and in-app utility

Form key partnerships and integrations

Grow community through campaigns and events

Q4 2025

#### Ecosystem Expansion

Prepare for exchange listings

Q1 2026

#### Full DeFi Lending Platform Goes Live

Q2 2026

#### Scaling and Institutional Growth
